VIDEO DOORMAN SAFE LOBBY ®

Patent Pending

A Safer Building is a Safer Investment
It's like having a security guard for $.75/hour

95% of building crime begins at the front door.
The Video Doorman Safe Lobby System provides a building with remote security and surveillance 24/7,just like an actual doorman or guard. It limits access to tenants; it makes sure the front door is closed;it detects forced entry; and it prohibits loitering in the lobby. Access control, monitoring and recording are all rolled into one system. It's the only proactive security system available.

HOW IT WORKS
The system integrates a card reader and front door contact with cameras, and speaker/microphone in the lobby and elevator. It is linked to a high quality Digital Video Recorder equipped with Video Analytics connected to a high speed IT line and 24-hour UL certified Central Station operators that proactively prevent loitering in the lobby.

WHAT YOU GET
- 24/7 Access Control & CCTV Surveillance
- A Safe Lobby and entrance area
- Loitering/Soliciting Prevention
- Video Analytics alert Central Station operators to loitering
- 24/7 Emergency Panic Buttons in the lobby.

1 ACCESS CONTROL
The system starts with an exterior Video Doorman card reader tied into the front door.Tenants use a fob to enter the building. If a fob is lost, it is programmed out.
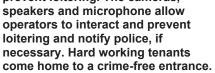

2 CENTRAL STATION
An internet A/V signal travels over a high speed internet connection to a 24-hour UL certified Central Station. Operators are trained to handle video monitoring calls and will dispatch authorities and notify owners when necessary.

3 ENTRY SURVEILLANCE WITH PROACTIVE ANTI LOITERING ANALYTICS
Cameras with proprietary video analytics monitor lobby and entrance to alert trained Central Station operators to warn intruders and prevent loitering. The cameras, speakers and microphone allow operators to interact and prevent loitering and notify police, if necessary. Hard working tenants come home to a crime-free entrance.

4 EMERGENCY PANIC BUTTONS
Emergency Panic Buttons in the lobby for added tenant security and assistance. When pressed, our operator comes online, and can see, hear, and communicate.

5 DOOR AJAR FORCED ENTRY PREVENTION
If a door is left ajar, anyone can enter. Tenants conducting illegal activities always leave the door ajar so their clients don't wait outside. Operators are notified electronically when a door is ajar and immediately notify building management to correct the problem.

Video Doorman Safe Lobby Services

1. **CARD ACCESS DOOR CONTROL & MANAGEMENT**
   Enrollment. No more keys outstanding or lost. Every tenant registers for a fob and if it's lost, it will be programmed out of the system.

2. **24/7 CCTV RECORDING**
   With a capability for Central Station interface, audio and visual.

3. **ANTI LOITERING**
   Video Analytics monitors lobby and entrance cameras. If a person(s) stays in the lobby more than 4 minutes, our Central Station operators are alerted and come online to ask them to leave: "No loitering allowed in the building." If they don't leave, they will be informed that the Police Department will be dispatched. If they stay, we dispatch. Anti Loitering removes potential muggers, drug dealers or homeless people from the lobby. Tenants feel safe knowing they are coming home to an entrance with no potential threats. For owners, this greatly reduces potential liability.

4. **DOOR AJAR NOTIFICATION**
   We've found drug dealers often leave the front door ajar, to conduct their illegal activities, so their customers don't have to wait to be buzzed in. If the door is left open more than 5 minutes, we notify building management and can email a clip of the person who left it open.

5. **VITAL SIGNS MONITORING**
   The DVR is programmed to report to Central Station when it needs service, if a camera is out, or if it's turned off.

6. **24/7 EMERGENCY PANIC BUTTONS**
   Emergency Panic Buttons in the lobby for added tenant security and assistance. When pressed, our Central Station operator comes online, and can see, hear, and communicate to assist tenants.
